SANDHAVEN HARBOUR WEST BASIN PONTOON REPLACEMENT PROJECT

We invite you to submit a tender for the replacement of the existing Pontoons, Fingers, supporting wall guides and new access bridge for the West Basin at Sandhaven and Pitullie harbour.

Your tender will be used in the first instance to continue with the sourcing and application of suitable funding.

This is a design and Build contract to accommodate circa 16 small vessels on the south quay with a minimum distance of 5.8m between fingers including an access bridge with an angle no greater than 12 degrees at low tide.

On the north east quay known as the 'Breest' please provide a layout to accommodate 8 No. fishing vessels with a minimum distance of 7.5m between fingers, the existing stone steps will be used as access and you should allow for fitting mini mesh GRP to the steps.

An indicative drawing is attached and the Tenderer will be assumed to have made such site visits as required and taken note of and discussed with the Chair or Consultant, any special circumstances or difficulties associated with the site location including access for provision and installation purposes of the works.

The completed offer must be sent to the above address and enclosed in a sealed envelope not bearing any indication of the Tenderer on the envelope or in the franking thereon and having written on the top left-hand corner, 'Tender for Sandhaven and Pitullie West Basin Pontoons'.

TENDER RETURNS MUST BE MADE NO LATER THAN TUESDAY 8TH NOVEMBER, 2016

Chairman: Robert Smith
44 Pitullie, Sandhaven, Fraserburgh, AB43 7EU
Tel Nos: 01346 518295
Email: rsmith@sandhavenharbour.co.uk
Registered Office: 40 Broad Street, Fraserburgh, AB43 9AH

Sandhaven and Pitullie harbour Trust does not bind itself to accept the lowest or any tender. We will not be responsible for or pay for expenses or losses which may be incurred by any Tenderer in the preparation or submission of their tender.

Note: The Basin is tidal and in addition, given sea states throughout the year but particularly over the winter months, the proposed pontoons, fingers and supporting hardware/structure supports and guides will of necessity have to be constructed of heavy duty materials capable of withstanding such onerous conditions, the harbour dries out and protection to the floats should be provided.

If and when it is intended to award a Contract, a written notification will be sent to each of the tenderers. Given the resources of the Trust it will be a condition of tender that upon the placing of an order, a maximum deposit of £10,000 will be made.

Yours faithfully,

John Elliott Wallace
